

# TONY'S CREATIVITY AND IDEAS

We have previously featured some of **Tony Mandarano's** creations as he had exhibited at the November'19 Show. In fact Tony has created astonishing things and has come up with ideas that have amazed/amused his fellow Shedders, some of the photos will explain better than any words can.

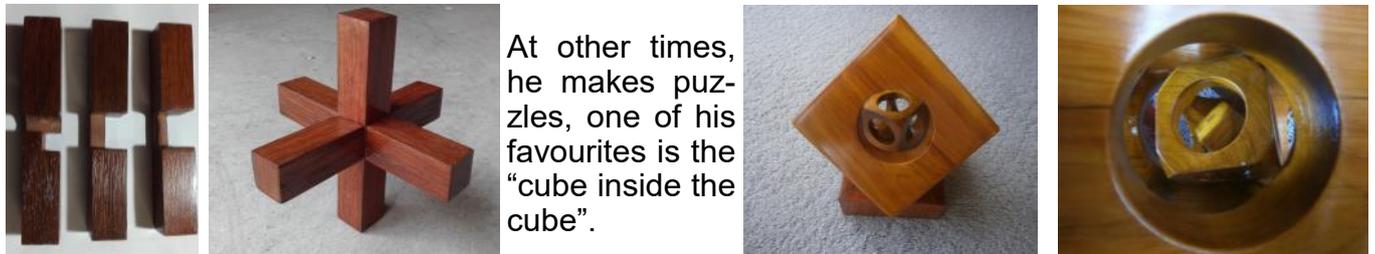

Proud of his heritage, Tony has created a "Little Italy" in his home, a home he keeps filled with furniture and gadgets made by him.

An accomplished, self taught woodturner, Tony has created some incredible turned projects, bowls and plates.

As a woodturner, he shifted his attention to making pens which he has generously gifted to many of his friends at the Shed.

At other times, he makes puzzles, one of his favourites is the "cube inside the cube".

Clocks, key holders, a perpetual calendar, cutting boards and various candleholders are also among his favourites, as are shelves and cupboards that make living at home more pleasant.
