

POSSUM BOXES

In what has just about become a production line in the past 18 months, **Peter Black** has led the members of the Waverley Shed in the creation of habitat boxes in 2 sizes, one for ringtail possums, the other for brushtail possums.

When they are in production, it is a very efficient process crating these boxes, starting with cutting up sheets of 2400x1200 sheets of 5 ply to a design template that WIRES provided.

The members of the Waverley Shed have made well over 100 boxes to date, and we expect that we'll be called upon to make more boxes when the current COVID scare is finished.

Rather than singling out any individual member (since so many have helped Peter), all members (and you know who you are) are thanked for working on this valuable community service.
